Office Action Summary

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-23, 25, 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Montgomery in view of Pagano et al. and Beaver.

Montgomery teaches ~~an artificial~~ an artificial fingernail composition comprising monomeric methacrylate esters, Di-and tri functional monomeric methacrylate esters and a tertiary amine accelerator (abstract). Trimethylol propane trimethacrylate (column 1 line 36) and tetraethylene glycol dimethacrylate (column 8 lines 33-34) are disclosed. Ethyl methacrylate (column 1 line 30) and hydroxyl propyl methacrylate (column 4 lines 3-4) are specified. Hydroxy Benzotriazoles are disclosed (column 4 lines 25-33).

Pagano et al teaches a nail enamel composition comprising a polymer synthesized from a monoethylenically unsaturated vinyl monomer containing plural carboxyl groups (abstract). Acetoacetoxy-ethyl methacrylate is specified (column 6 table). Superior gloss, adhesion and wear are disclosed (column 1 lines 33-35).

Beaver teaches artificial acrylic fingernails (abstract). Plasticizers such as phthalate esters are specified (column 7 line 7-8).

It would have been obvious to one of ordinary skill to add monethylenically unsaturated vinyl monomer comprising plural carboxyl groups to the composition of Montgomery to achieve the beneficial effect of superior gloss, adhesion, and wear in view of Pagano et al.

As to the claimed plasticizer, such are known to be added to artificial acrylic fingernails in view of Beaver.
